IN THE CLAIMS:

✓ Please cancel Claims 1-84.

Please add the following new claims:

Sub 41  
B1

85. (New) A method for locating a mobile station, MS, when there is an occurrence of at least one of: said mobile station MS is being tracked, and a request for locating said mobile station MS, wherein said method uses wireless signal measurements obtained from transmissions between said mobile station MS and a plurality of communication stations, each capable of at least one of: wirelessly detecting said mobile station MS, and wirelessly being detected by said mobile station MS, comprising:

providing access to first and second mobile station location estimators, wherein said location estimators provide location estimates of said mobile station MS when said location estimators are each supplied with corresponding input data obtained from wireless signal
